

Group S chooses Sinube as their partner for a journey to the Oracle ERP Cloud

Sinube is delighted to announce that Group S has chosen Sinube as their implementation partner for the upgrade of the Oracle E-Business Suite to the Oracle ERP Cloud.

Group S is a solid HR organization that supports companies in their daily staff administration and payroll management. Group S is made up of complementary business units: a social secretariat, a social fund for self-employed workers, a one-stop shop for the creation of enterprises (Formalis) and a child benefit fund (KidsLife). With an extensive network of partners and intermediaries, Group S offers a wide range of services through a single point of contact and can do much more than simply calculate wages on time. In addition, Group S also develops its own software for starters, self-employed workers and employers.

The first phase of the project consists of the implementation of the Oracle Financials and Procurement Cloud service integrated with the invoice automation platform Routty. The second phase will consist of the rollout of the Oracle Engagement Cloud.

"The benefits of Oracle ERP Cloud have been clear to us for some time", clarifies **Charles Stubbe**, audit director of Group S. "Oracle ERP Cloud, which excels in user experience and functionalities compared to the E-Business Suite, is an enrichment for our daily business operations."

The assignment of the contract is based on an open market consultation. After a thorough technical review of the competencies of the parties, the contract has been awarded to Sinube.

"Sinube was able to distinguish itself significantly from the other parties through its Rapid Upgrade methodology, with which it can migrate existing Oracle E-Business Suite users to the Oracle ERP Cloud application in a well-considered, phased and structured manner," says **Eric Dumont**, ERP project leader.

Group S and Sinube/RMC know each other from a previous collaboration. In 2006 both companies worked together for the implementation of Oracle E-Business Suite ERP. The project satisfaction resulting from the previous contract was once again confirmed by endorsing the upgrade to Oracle ERP Cloud.

"In the past we were able to rely on the expertise of Sinube/RMC. Their consultants always understood our needs and the results were at the level of our expectations. We therefore feel very confident about the upcoming project", says Eric Dumont.

Kurt Vanlooster, Managing Partner of Sinube, is excited with the renewed collaboration. "The agreement with Group S is a confirmation of our approach and expertise that we have built up over the years in Oracle Cloud implementations. We look forward to a smooth collaboration to achieve the maximum of expectations."

Sinube NV is the Oracle ERPM Cloud competence center of the Cronos Group. The company is active in Belgium, Luxembourg and The Netherlands. In addition to the Oracle ERP Cloud, Sinube also specializes in Enterprise Performance Management (EPM) and Robotic Process Automation (RPA). Sinube is a spin-off from RMC that has been the Belgian market reference for Oracle ERP implementations since 1999. Sinube is also Oracle Platinum Partner and Cloud Excellence Implementer (CEI).
